In the previous Office action, mailed on 12/15/2008, applicant was notified that claims 1-4 and 9-12 were rejected under 35 U.S.C. 103(a) as being unpatentable over Yahagi (JP 07-261080 A) in view of Ishii (JP 2002-098805 A). Claims 5-8 and 13-16 were each objected to for being dependent upon a rejected base claim. The abovenoted rejections were successfully overcome by amendments to the claims filed by applicant on 03/16/2009, in response to the previous Office action. Independent claims 1 and 9 were amended under the aforesaid amendment. Claims 1-16 are currently pending in the application.

**Claims 1-16 are allowed in light of amendments filed by applicant on 04/10/2009. All pending claims thus being allowable, prosecution on the merits is closed in this application.**

The following is an EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE for the above-noted claims. The prior art taken either singly or in combination fails to anticipate or fairly suggest the features/limitations of the independent claims extant in the instant application, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper.

In regard to claim 1 the prior art taken either singly or in combination fails to anticipate or fairly suggest a zoom lens comprising five lens units configured in a [+ - + +] optical power arrangement in which "the fifth lens group includes a negative sub lens group having negative refractive power and a positive sub lens group having a positive refractive power, wherein the positive sub lens disposed in the fifth lens group has an aspheric surface, and wherein the image can be shifted in conjunction with a shift of the positive sub lens group in a direction substantially perpendicular to the optical axis; and the zoom lens satisfies the conditional equation  $0.6 < f_{5p}/D_a < 1.4"$  (Claim 1, Line 13-19), taken together in combination with the totality of particular features/limitations recited therein.

In regard to claim 9 the prior art taken either singly or in combination fails to anticipate or fairly suggest an imaging apparatus comprising a zoom lens and an imaging device that converts an optical image formed through the zoom lens to an electric signal, the imaging apparatus being characterized in that the zoom lens includes five lens units configured in a [+ - + +] optical power arrangement in which "the fifth lens group includes a negative sub lens group having negative refractive power and a positive sub lens group having a positive refractive power, wherein the positive sub lens disposed in the fifth lens group has an aspheric surface, and

wherein the image can be shifted in conjunction with a shift of the positive sub lens group in a direction substantially perpendicular to the optical axis; and the zoom lens satisfies the conditional equation  $0.6 < f5p/Da < 1.4$ " (Claim 9, Line 15-21), taken together in combination with the totality of particular features/limitations recited therein.

ANY COMMENTS CONSIDERED NECESSARY BY APPLICANT MUST BE SUBMITTED NO LATER THAN THE PAYMENT OF THE ISSUE FEE AND, TO AVOID PROCESSING DELAYS, SHOULD PREFERABLY ACCOMPANY THE ISSUE FEE. SUCH SUBMISSIONS SHOULD BE LABELED "COMMENTS ON STATEMENT OF REASONS FOR ALLOWANCE."

The SUBSTITUTE SPECIFICATION filed on 07/07/2007 is acceptable. It has been entered in the instant application.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ohtake (U.S. Patent No. 7,385,766 B2) and Ohashi (U.S. Patent No. 7,038,858 B2) disclose other zoom lenses including five lens units configured in a [+ - + + +] optical power arrangement.
